Exercise – *Build the Sum*

Given $n \geq 1$ integers $a_0, a_1, \ldots, a_{n-1}$, calculate the sum $\sum_{i=0}^{n-1} a_i$.

Input The first line of the input contains the number $t \leq 10$ of test cases. Each of the t test cases is described as follows.

- It starts with a line that contains an integer `n`, denoting the number of integers to sum up, such that $0 \leq n \leq 10$.
- The following line contains n integers `a`$_0$ `...` `a`$_{n-1}$, separated by a space, such that $-1000 \leq a_i \leq 1000$, for every $i \in \{0, \ldots, n-1\}$.

Output For each test case output one line with a single integer that denotes the required sum.

Points There is one group of test sets, worth 100 points in total.

Sample Input

```
2
6
-3 -1 4 2 0 3
1
1
```

Sample Output

```
5
1
```
